BACKGROUND OF STUDY

During the fall of 2008, the City of Rye, New York contracted with JCJ Architecture for the purpose of studying alternative solutions for accommodating the needs of the City's Police Department and Court Facilities. The scope of the study included the following format::

Task 1 – Evaluation of Program Requirements

This first step involved meetings with local City officials, as well as Police and Court end-users. Existing Police and Court Facilities were visited and a field tour was made of each potential site. Previous programming studies were also reviewed, and where appropriate, updated to reflect current needs and practices. Meetings, held October 27, 2008, as contained in Appendix, Meeting Reports summarize program issues and desires as expressed by various constituencies and end-users. It was made clear that whatever alternative solution that is finally accepted, should meet the following:

be functional

meet all Police and Court planning guidelines

be program compliant

be safe

meet all codes

be environmentally sensitive

take into account community planning needs and opportunities

be of quality design

be well constructed

be prudent financially, even if somewhat more expensive

be a long-term 50-70 year solution to the building needs for both Police and Court Facilities.

Task 2 – Comparison of Site Alternatives

Once the program needs were confirmed and information gathered for each site alternative, internal and external conceptual sketch layouts and potential costs were prepared to determine the project scope and feasibility of each location. In addition, project schedules and a matrix of comparative issues was developed to provide resource information and to assist in determining the best site and location for the Police/Court Building.

BACKGROUND OF PROGRAM

An updated program was prepared based on previous studies completed in 1999 and 2007 and current meetings with City and New York State Office of Court Administration (OCA) representatives. Meeting results are summarized in the Appendix. The program in table format lists required room sizes and rule of thumb, gross-up factors for support spaces, circulation and buildings components in order to arrive at gross overall building scope. These areas are summarized as follows in rounded, gross figures for each of the major functional areas of the building, assuming a 1 ½-story design.

	S.F.
Police	
Public Access and Administration Areas	9,000
Operations Area	9,000
Court	
	9,000
Total G.S.F.	27,000

If a 3-story design is utilized, the gross building area is increased by approximately 2,000 S.F. due to increased mechanical and vertical circulation requirements for a total of 29,000 G.S.F.

Parking requirements are as follows:

Police	
Operational Vehicles	22 patrol cars, 3 other
Employees	19
Visitors	15
Court	
Employees	8
Visitors	15
Total	82

EXISTING SITE STATISTICS

Statistics for each of the existing site alternatives are as follows:

1037 BPR-Lester's Building

Property: 30,000 S.F.
Lester's: 9,500 S.F. Main Floor with a 9,500 S.F. Basement in the flood plain
(assumed at elev. 18)
Parking: 42 surface spaces
approximately ½ in flood plain)
Cost: \$6,000,000

1031 BPR- Adjacent Salon Building

Property: .14 acres
Cost: \$1,200,000

McCullough Place -Present Police/Court Building

Property: 9,600 S.F.
Building: 12,252 S.F. as follows:
(Partial 2-story with small basement)
3,727 S.F. 2nd Floor Court
6,655 S.F. 1st Floor Police
1,870 S.F. Basement Police

Adjacent City-owned property bordering the MTA rail station is approximately 23,000 S.F., not counting the steep, wood-slope to the east.

The property to the rear on Second Street has a footprint of approximately 8,700 S.F.

The program for an alternative ideal site would consist of approximately 2-3 acres and have a slope of about 12-15', allowing a 1 ½-story building design which is optimum, given the program requirements. A site of less than ½ acres would require some structured parking and limited space for setbacks and buffers with surrounding properties. A 3-story configuration would reduce building footprint and allow for a slightly smaller property of approximately 1 acre with structured parking. In any case, all sites should have two means of egress.

JCJ PROGRAM				
	Quantity	Subtotal	Total	Comments
POLICE DEPARTMENT

TOTAL POLICE + COURT GROSS AREA =			26982

ALTERNATIVE No. 1 NARRATIVE (- Sketches 1-4)

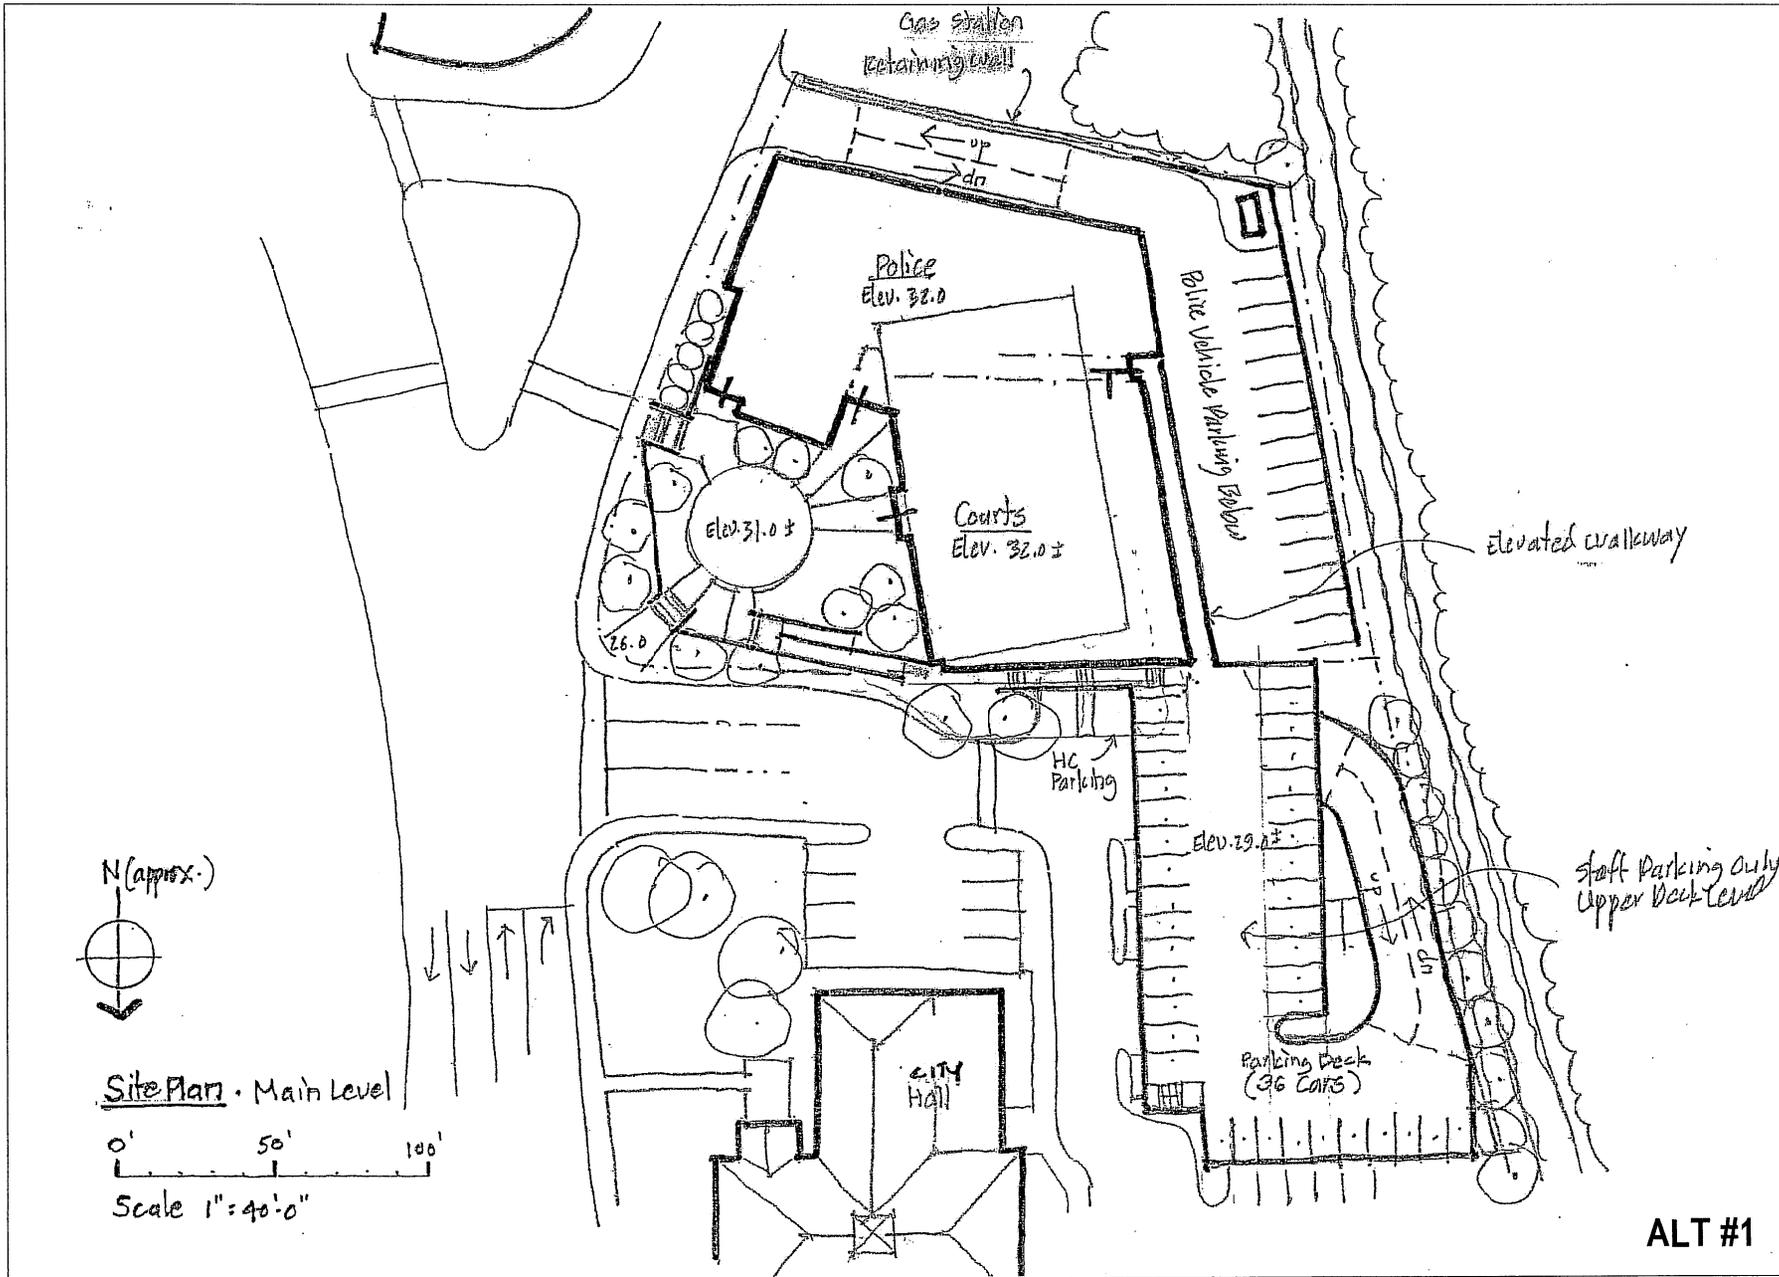

This alternative would require use of both 1037 and 1031 Boston Post Road in order to allow for a 1 ½-story building with both the Police and Court having street level presence and entrances. The combined site would allow for a new two-way access at the southern boundary along with joint use of the present City Hall/Library access point at the traffic light.

The flood plain is at approximately elevation 17', therefore requiring the lower floor to be at elevation 18' or higher, which then sets the Main Street floor at approximately 30' or higher. Because the ground level at the front is approximately elevation 24-26', the new building would require significant exterior steps, an entry plaza or be designed to enter at a split level. Parking decks to the rear, including that for police operational vehicles, would also be set above the 100 year flood elevation. This would require considerable construction and expense to accommodate parking and access needs and to provide compensatory flood storage area. It might also be considered desirable to have any new building construction match that of the existing City Hall/Library buildings, which may increase building costs

Construction phasing would first require demolition of Lester's and preparation of this area for temporary parking for City Hall needs. This would allow construction of all parking decks and surface reconstruction to the rear City Hall. Once completed, the new Police/Court Building would be built and completed as Phase II.

Upon project completion there would be 107 parking spaces to serve the City Hall, Rye Free Reading Room and Police/Court facility. Currently there are 100 parking spaces.

ALTERNATIVE No. 2 NARRATIVE (Sketches 5-9)

This alternative envisions the construction of a 3-story Police/Court Building to reduce ground footprint and eliminate the use of 1031 Boston Post Road, which is immediately adjacent to the City-owned (Lester's) property. Issues regarding the flood plain and proper setting of floor elevations would remain the same as in Alternative No.1. Access to the parking deck is moved toward the front of the site in order to make better use of existing grades and to avoid construction of a structural ramp to the rear. Under this alternative, access to the building could be achieved directly from the upper parking deck along an external, raised walkway.

Issues of architectural style and construction phasing would be the same as Alternative No. 1. The 3-story configuration would however, eliminate the potential for street presence by both Police and Court users and would be treated more like an office building, with a common yet split entry lobby. The 3-story building would require additional square footage to account for an added common entry lobby, fire-exit stairs, elevator and vertical mechanical duct spaces approximating 2,000 G.S.F.

Upon project completion there would be 119 parking spaces to serve the City Hall, Rye Free Reading Room and Police/Court facility. Currently there are 100 parking spaces.

ALTERNATIVE No. 3 NARRATIVE (- Sketch 10)

This concept envisions the use of 1037 Boston Post Road, the present Lester's Building for Police functions with the addition of approximately 9,000 for the Courts, resulting in a total floor area of 29,000 square feet. . By doing this the lower level housing Police operations would be in the flood plain and require special diking or water proofing protection measures. Parking for Police vehicles would also be in the flood plain and require similar special treatment at great expense. A total of 99 parking spaces would be provided, where 100 spaces currently exist on the City Hall/Rye Free Reading Room/Lester's properties.

Although depicted here for study purposes, this is not considered to be a viable option.

10

ALTERNATIVE No. 4 NARRATIVE (- Sketches 11-14)

This approach requires the acquisition of the property on Second Street, (a.k.a. "Ganz Building"), directly behind the current Police Headquarters/Court Facility. This building as part of Phase I would be demolished and a new Police/Court facility built as a wrap-around ("outside the box" so to speak) that would utilize the cleared site and the current Police parking area on City-owned property to the north. The new building would be 1½-stories with Police/Court functions having street presence and access at the Main level and Police operations on a lower level. Once the wrap-around building is completed, the existing Police Headquarters/Court Building would be demolished and a lower level Police vehicle parking, street level entry plaza, and completion of front entries for both Police and Courts would be constructed as Phase II. Existing street and City-owned parking would remain for staff and visitors.

During construction, arrangements would have to be made for displaced Police vehicle parking along the north side of the building. Since the new structure would be built almost to the property line, street and MTA property, construction easements would be required and likely modification of the MTA parking lot "road". Additionally, the lower level Police vehicle parking garage under the entry plaza and a portion of the building would have to be set at elevation 42' or lower, thus potentially requiring extensive rock removal. If the Main level is set at a higher elevation than say 54', split level entry or other access complications may result.

ALTERNATIVE No. 5 NARRATIVE (Drawings 15, 19-21)

This alternative envisions the construction of a new 3-story Police/Court Building on City-owned parking areas at the end of McCullough Place. Once the new building is completed, the present Police/Court would be demolished and replaced with an adequate parking deck structure to support all Police/Court parking needs. An impound yard as a cost option could be carved out of the sloped area to the east of the sally port.

Because of the use of the current City-owned parking area and the 3-story design concept, the acquisition of additional property would not be required. If a roadway is extended through McCullough Place to the MTA parking area, site constraints would still require adjacent construction easements. Since the parking deck is separate from the building, there would be greater flexibility in setting floor elevations to avoid or reduce the potential for rock removal.

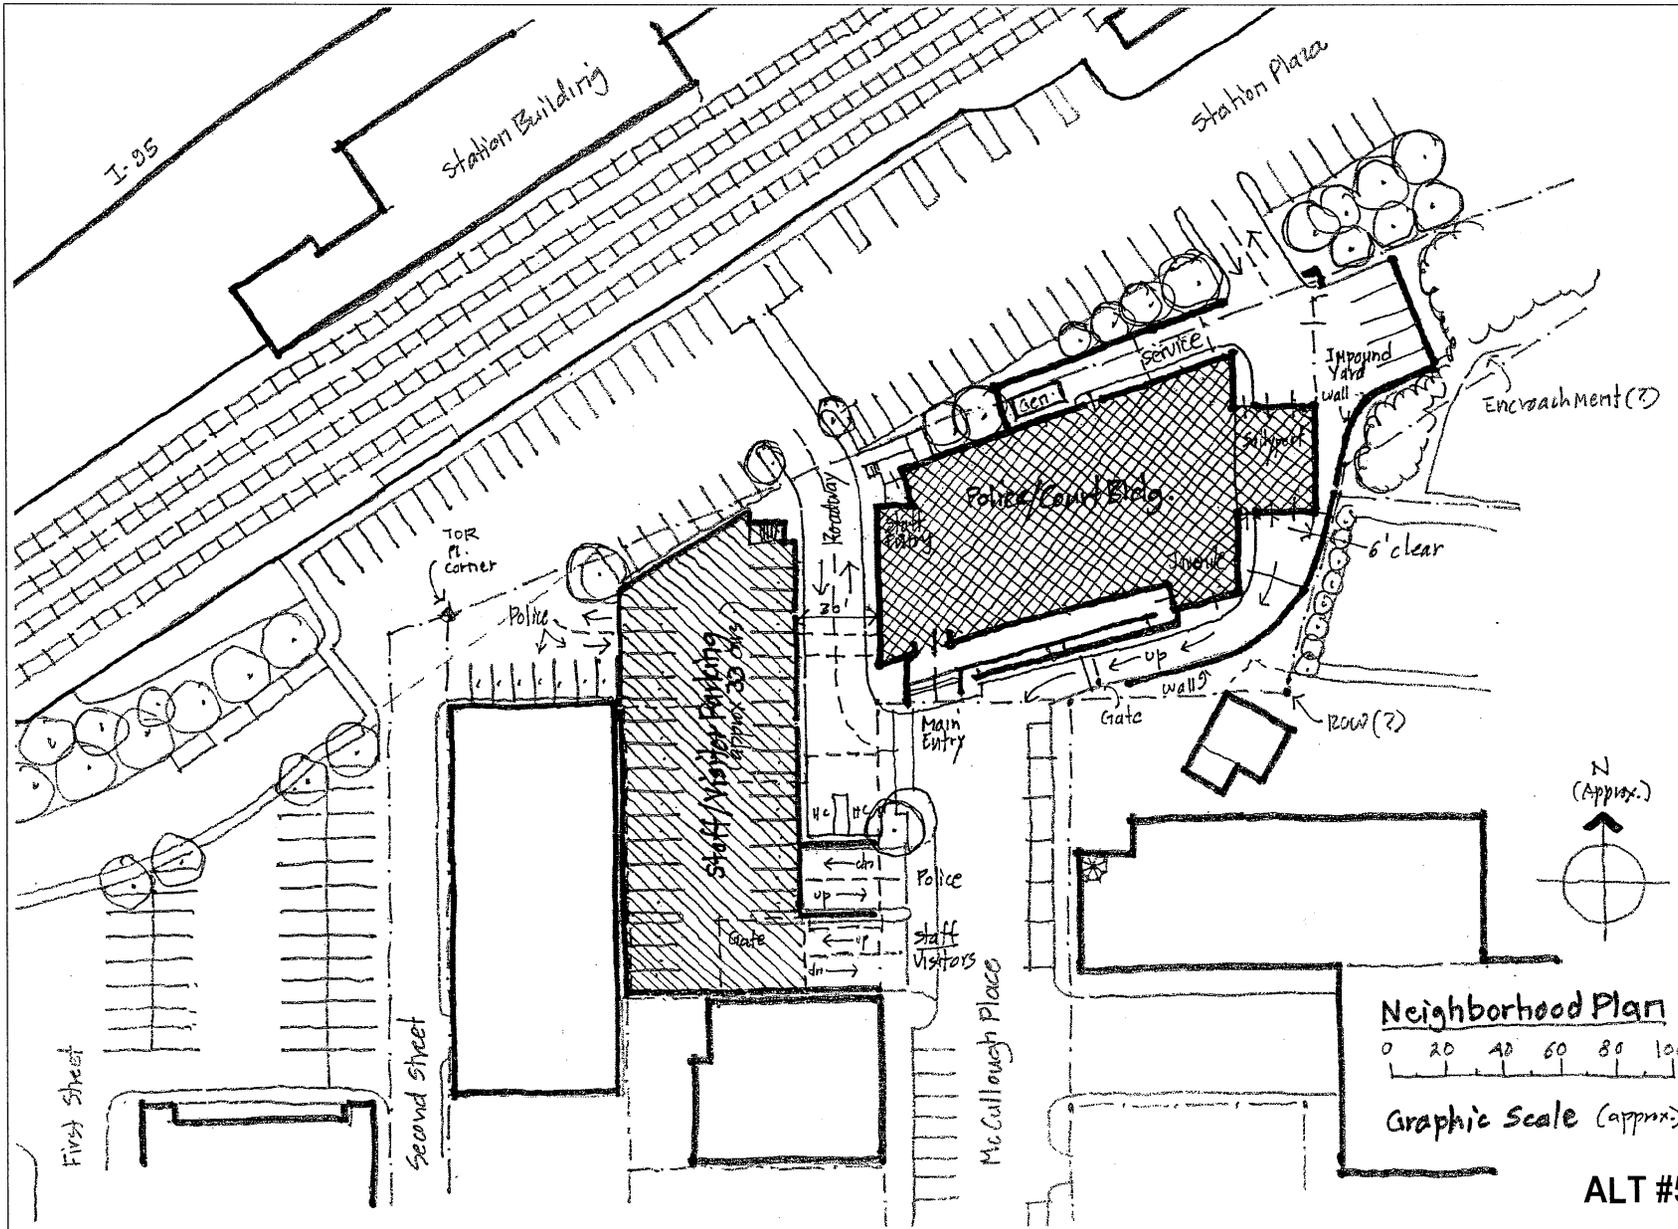

It would also be possible as depicted in Alternative No. 5 Drawing 17 to construct additional deck parking in a very cost efficient manner if the adjacent property on Second Street were to be acquired. Depending on the height of the parking structure and number of decks constructed, approximately 150-200 spaces could be provided for commuter and transient parking for the area. This would provide a great opportunity to masterplan this section of the CBD for additional development providing an economic generator for the City of Rye.

ALTERNATIVE No. 5 NARRATIVE (Drawings 16-18)

This design concept is basically the same as outlined above except that a walkway and not a roadway connects the end of McCullough Place to the Railroad Station. This is an important design consideration given that it allows greater flexibility in siting the building, allowing it to be moved further away from the eastern sloped boundary and closer to the parking deck. This also provides greater flexibility in setting grades and thus reduces excavation and retaining wall costs. In addition, it is possible to locate the building away from the MTA property line thus reducing the need for critical easements. The site plan for the new Police/Court Building and parking decks is consistent with the MTA's master plan for parking and access improvements at the Railroad Station.

Appropriate traffic analysis would need to be conducted to assess the potential traffic impact of this alternative.

ALTERNATIVE No. 6a NARRATIVE (- No Sketches)

The present Police/Court Building would be demolished and a new 2 story structure totaling approximately 19,000 sf would be built to accommodate Police Department's needs. Existing Police and adjacent parking would remain as is and no additional property would be required. In order to permit construction of the new building, the Court would be first relocated to the renovated building at 1037 Boston Post Road at the City Hall site, followed by temporary relocation if the entire Police Department including parking to an alternate location somewhere within the City of Rye. Finding a site for the temporary relocation of the police department will be challenging and have significant cost and operational implications.

ALTERNATIVE No. 6b NARRATIVE (- No Sketches)

This approach envisions the relocation of the Court facilities to the street level floor of the former Lester's building at 1037 Boston Post Road. The lower level would not be utilized since it is within the "flood plain". Parking would remain as currently located. The building would be completely renovated including new mechanical and electrical systems to accommodate the Court's needs.

ALTERNATIVE No. 7 NARRATIVE (- No Sketches)

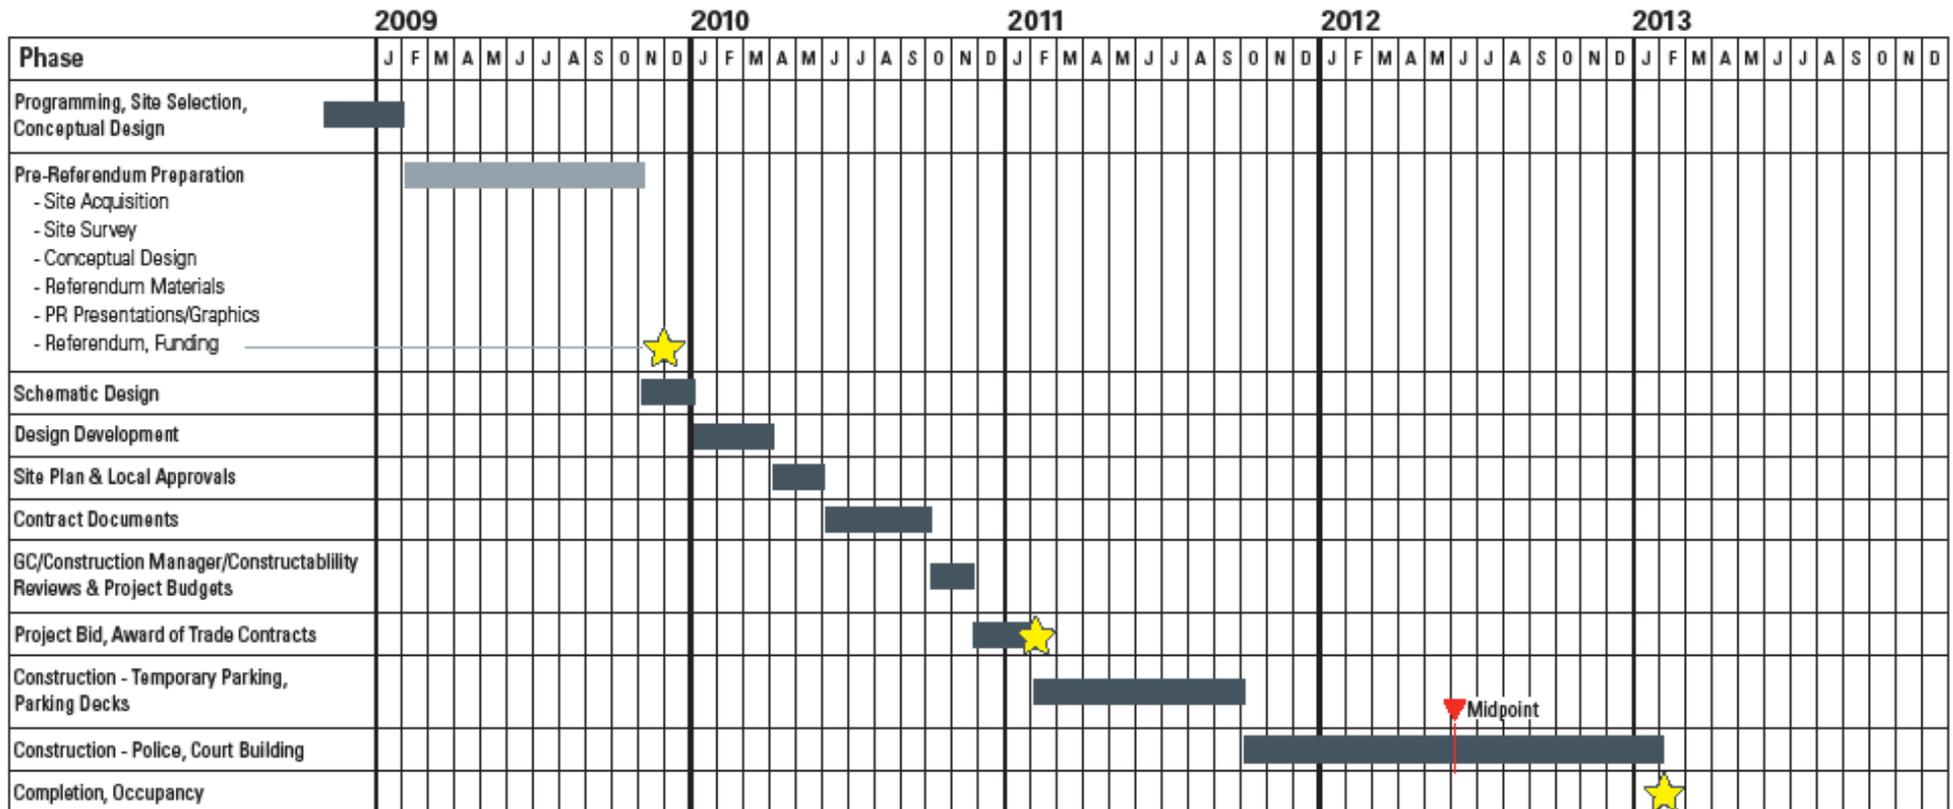

No suitable alternative site has yet been identified within the City of Rye. A hypothetical property would be somewhere in the 1.5-3 acre range, have a slope approximating 12-15", be well proportioned and have two means of egress at remote locations of the property. A site of less than 1 ½ acres may likely require some structured parking and would have limited set back space. Use of a 3 Story structure would allow for a slightly smaller site or where required parking demand could be satisfied within nearby off-site public parking areas.

Proposed New Police, Court Building, Rye, NY

Site Selection Study

Probable Project Schedule - Alternate #1 City Hall Site with Additional Property Required - 1037 Boston Post Road

(1 1/2 story concept)

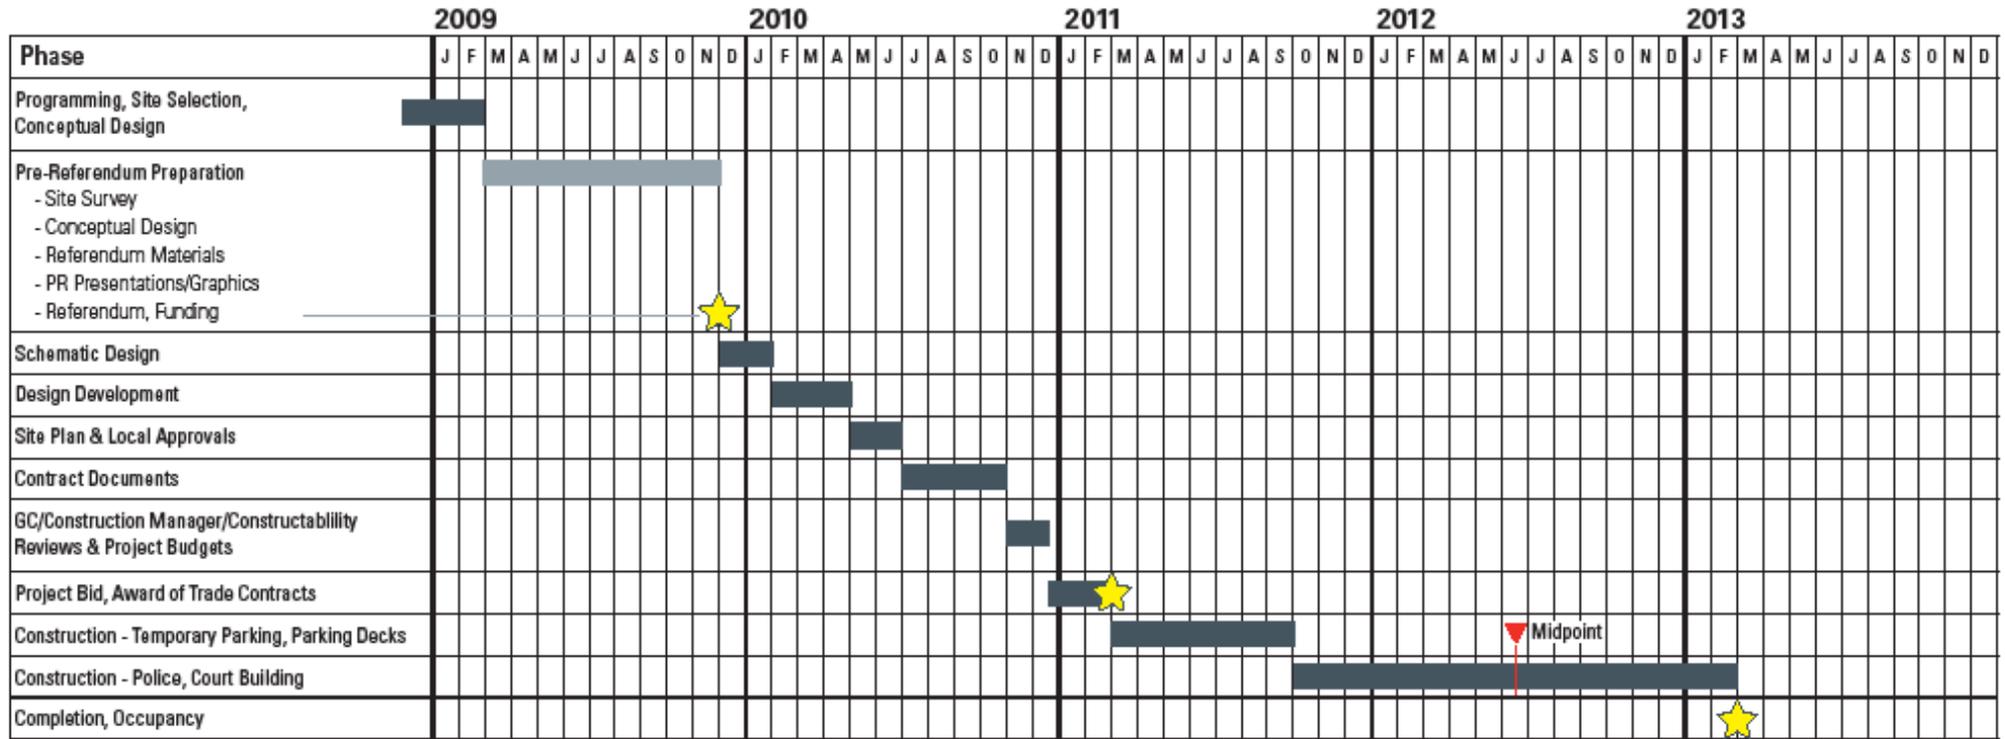

NOTE: does not reflect fast-track construction approach

October 31, 2008

PROJECT: City of Rye Police and Court Feasibility Study
JCJ Project # H08061.00

PURPOSE: Preliminary Feasibility Study Meeting with City Council

PRESENT:

Christian K. Miller, City Planner	City of Rye, NY
Mayor Steven Otis	City of Rye, NY
George Pratt	City of Rye, NY
Catherine Parker	City of Rye, NY
Joe Sack	City of Rye, NY
Mack Cunningham	City of Rye, NY
Andy Ball	City of Rye, NY
Paul Shew	City of Rye, NY
Peter Stevens	JCJ
Dave Jepson	JCJ
Susan Sclafani	JCJ

This meeting was held October 27 at City Hall, Mayor's Conference Room.

DESCRIPTION

Meeting with members of the City Council regarding programming issues and the feasibility study:

JCJ presented a site selection matrix for discussion of features to be weighted when evaluating sites

- Mayor Otis
 - Identified Functionality as feature to weigh
 - Square footage requirements
 - ADA/Safety issues as it relates to the Courts specifically if facilities are to be separated.
 - If considering Parking garage as part of project, it should be solely to house police vehicles and not be accessible by public
 - Approach MTA for funding, but beware of "devil's bargain".
- George Pratt
 - Sited Traffic as it relates to the existing and multiple sites shall be weighted. If Site 1037 Boston Post Road is recommended, the city will bear the burden of the traffic rework
 - Indicated that the public perception is that the Police want "new toys".
 - Regarding the acquisition of the 1037 Boston Post Road property, the City Council promised the voters that there will be a presentation which makes recommendation which have costs associated with it for the election in November 2009.
 - Consider that State will absorb some of the costs for the new or renovated facility

- Need a “safe & appropriate “ facility, sensitive to fiscal environment, but can be defended even if the recommendation is “more costly”
- Unpopular Public Works property option was brought to table for consideration, amongst many others, including Ford Dealership
- Opinion was that public will come to election questioning why a certain property was not considered.
- Provide a fair evaluation (pros and cons) of all options to the committee
- Joe Sack
 - Concern with Disbrow location and proximity to residential area.
 - Requested summary of other stakeholder meetings
 - Consider thruway property, Rye Arts Center, Biltmore Motor Sites
 - CBD Location seems more appropriate location, refer to recent Town of Harrison Police Department plans.
- Andy Ball
 - Take into consideration the \$1M that was put into the renovations for the Police Station.
 - Consider approaching MTA regarding sharing in cost if it means keeping the facility where it is.
 - Facility should remain downtown
- Catherine Parker
 - Cost of project is the greatest concern.
 - Why not Disbrow park? Sotheby’s lease, consider feasibility of this site.
- Mack Cunningham
 - There was public criticism of the cost of Milton Firehouse.
 - Concern with 1037 BPR Flood Zone
 - Public expects a facility to accommodate community needs for the next 50-75 years.
- General
 - Be prepared to site differences and defend recommendation
 - Find out downside to not meeting OCA requirements. Does it mean no funding?
 - With the economy the way that it is, perhaps more sites will become available.
 - Concern with 1037 BPR Flood Zone

These notes represent our summary of this meeting, and will become part of the project record and form the basis upon which we will proceed. If any participant in the meeting wishes to comment or modify these minutes, please notify the undersigned prior to the next scheduled meeting.

October 31, 2008

PROJECT: City of Rye Police and Court Feasibility Study
JCJ Project # H08061.00

PURPOSE: Preliminary Program Meetings-Court Facilities

PRESENT:

Christian K. Miller, City Planner	City of Rye, NY
Steve Otis, Mayor	City of Rye, NY
Judge Peter Lane	City of Rye, NY
Judge Richard Runes	City of Rye, NY
Tomme Berg, OCA Executive Director	Ninth District
Tonia Cipriano, City Court Chief Clerk	City of Rye, NY
O. Paul Shew, City Manager	City of Rye, NY
Peter Stevens	JCJ
Dave Jepson	JCJ
Susan Sclafani	JCJ

This meeting was held October 27 at City Hall, Mayor's Conference Room.

DESCRIPTION

Meeting with members of the Court Facility and OCA representative regarding programming issues:

- Provided listing of spaces for discussion (see attached)
- Separating Court and Police into separate facilities is not a good idea
 - Security issues/ Courts like having police in building in case of an incident
 - Much paper is transferred from Police to Courts, separation would be inconvenient
 - Police and Courts interact throughout the day
 - Incarcerated defendants need police escort(s), from facility to court as sheriffs and corrections officers are not utilized in Rye.
 - Perceived public safety with facilities combined. Many defendant utilize train and location is convenient presently
 - Courts have arraignments 24/7 and require police presence. There are no court officers available after business hours, so police support is required. Fingerprinting must be done prior to setting up trial.
 - There are approximately 4,000 cases /year. State of NY police have contributed to case loads.
- Existing office facilities are woefully inadequate
 - There are no jury rooms or staff rooms
 - There are no locker facilities for court officers
 - Security and privacy is inadequate
 - Ideal would be for 8-10 court officers. Presently have (2).
 - Chief Clerk and (3) assistant clerks
 - No jury deliberation room exists as space is now used for storage
 - No waiting area for defendants, no private meeting spaces for attorneys and

- clients
 - Two courtrooms are required- (1) large 1200 sf, (1) hearing Room 300-600 sf with bench and jury box. There shall be seating for (10) observers, 2-3 rows of seating
 - Youthful offenders are tried in Judge's Chambers, not in courtroom.
 - There shall be separate facilities for Juveniles
- Separate entry required for Court facilities
 - Present operational problem as no court holding facilities , separate from police holding cells
 - It was noted that a robbing room shall be provided only if the judge's chambers and conference room is not immediately located behind the courtrooms. This room is used for informal conferences
- Parking requirements:
 - Separate and secure parking for Judges and Staff of the court. There shall be reserved parking designated for Chief Clerk and Security Officer
 - Provide sufficient parking for visitors and attorneys.

These notes represent our summary of this meeting, and will become part of the project record and form the basis upon which we will proceed. If any participant in the meeting wishes to comment or modify these minutes, please notify the undersigned prior to the next scheduled meeting.

PROJECT: City of Rye Police and Court Feasibility Study
JCJ Project # H08061.00

PURPOSE: Preliminary Program Meetings-Police Union Facilities

PRESENT:

Christian K. Miller, City Planner	City of Rye, NY
Franco Compagnone	Rye Police Union
Tim Chittenden	Rye Police Union
Michael Kenny	Rye Police Union
Lou Olivier	Rye Police Union
John Hannah	Rye Police Union
Peter Stevens	JCJ
Dave Jepson	JCJ
Susan Sclafani	JCJ

This meeting was held October 27 at City Hall, Mayor's Conference Room.

DESCRIPTION

Meeting with members of the Police Department Union regarding programming issues:

- Discussion regarding deficiencies within existing police station
 - Training facilities non existent
 - Need an EOC to accommodate 15 people
 - Fitness center is in basement, cannot use some recently purchased equipment because of crowding and headroom.
 - Absence of sallyport
 - Police Vehicle storage nonexistent on premises
 - Absence of interview rooms for public/officer use
 - Male and Female locker rooms are inadequate.
 - Police Department used to occupy entire building.
 - Insufficient resources and infrastructure for technology within the building
- Security
 - Serious security threat is existing/ no outer perimeter is identified
- Location within Community
 - Ideally located so that do not get stuck in "village". Midland Street is a good route to skirt around downtown area.
 - 3 time a day sirens/light testing occurs- watch residential opportunities
 - Police Union feels that 1057 Boston Post road location would be good location as it is not hindered by village traffic
 - Existing location at Railroad station is good in the fact that defendants arrive to police station directly. Metro North uses Rye PD because of its proximity to depot.
- Public Space
 - Provide informal intake area within public lobby
 - Provide information kiosk for public access

- Patrol Facilities
 - No Roll call room is existing
 - Need to isolate light duty officer at Main desk away for prisoner processing area
- Detectives Facilities
 - Proper Evidence Storage is required for accreditation
 - Fire arm storage
- Court
 - Holding facilities in court area shall accommodate 4 people.
 - Separate or controllable elevator shall be provided if Courts are on floor other than PD Detention area for ease of moving prisoners
- Parking
 - There was a study done 15 or so years ago utilizing adjacent building for parking
 - Presently officers park cars wherever they can find spaces, there is no secured parking available for personal or patrol cars.

These notes represent our summary of this meeting, and will become part of the project record and form the basis upon which we will proceed. If any participant in the meeting wishes to comment or modify these minutes, please notify the undersigned prior to the next scheduled meeting.

PROJECT: City of Rye Police and Court Feasibility Study
JCJ Project # H08061.00

PURPOSE: Preliminary Program Meetings-Police Facilities

PRESENT:

Christian K. Miller, City Planner	City of Rye, NY
Commissioner William R. Connors	Rye PD
Sgt Nicholas J. Groglio, IT	Rye PD
Gail Klepps, Senior Office Asst	Rye PD
Peter Stevens	JCJ
Dave Jepson	JCJ
Susan Sclafani	JCJ

This meeting was held October 27 at Police Headquarters

DESCRIPTION

Meeting with members of the Police Department regarding programming issues:

- 40 Sworn Officers 16 civilian employees including two parking, 3-5 seasonal constables for bay patrol, 8 crossing guards
- Commissioner stated that staffing is projected to be stable, with not much growth anticipated Department has actually decreased in staff over the last 30 years
- Rye Police have jurisdiction over City of Rye ,including Ryetown Park, but excluding Playland Park Amusement Park which is covered by the county. Each Tuesday, PD transports detainees at County Jail and brings to Court for processing
- Crime consists of primarily burglaries, 15-25 year, down from 50+
- There has been a recent \$1M upgrade to facility to address mold and HVAC issues, but is predominantly cosmetic. Diesel generator was relocated outside as part of this renovation
- Police serve as a "Transport Agency" to the Courts.
 - In most violation cases, prisoner is released or transported to County jail
 - Minimal handling of defendants in police station.
 - Police stay with suspect when bring them to court, even though court officer has jurisdiction
 - Judges presently use Police entrance to avoid coming through public lobby
- Detention Facilities
 - Provide a separate Juvenile holding cell. Now use a holding room within Detectives
- Patrol Facilities
 - No pistol range is required
 - Outbuilding required for police vehicles and other equipment
 - Evidence Vehicle Processing Bay required, now use DPW space, with limited security
 - Presently fuel police vehicles at DPW.
 - Officer use bicycle storage required, now in plastic shed

- Technical support space (i.e. data closets, etc.) should be doubled and centralized
- Presently , there is no dedicated E/911 room
- Training facility is lacking- must go offsite

- Records
 - Archives located in attic. Destroy as becomes obsolete.
 - Kiosk for public access of records in lobby
- Parking
 - Egress Difficulties- rush hour, beginning at 4:00
 - Presently (9) designated spaces on the side of the building and a few at the front.

These notes represent our summary of this meeting, and will become part of the project record and form the basis upon which we will proceed. If any participant in the meeting wishes to comment or modify these minutes, please notify the undersigned prior to the next scheduled meeting.
