Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [4:14c]
 Project: Playland Parking and Plaza Renovation
 Date: January 2015

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

IMPACT ON LAND

The project involves reconstruction of existing developed areas. The project will not create any new impervious surfaces nor disturb any naturally vegetated areas.

IMPACT ON FLOODING

Although the project site is located within a special flood hazard area, there will not be any modifications that would alter the floodplain.

IMPACT ON HISTORIC AND ARCHAEOLOGICAL RESOURCES

The project will involve the removal of the swimming pool and the Games Row at Playland Park, created in 1928 and known for being the first planned amusement park in the country. The site is on the National Register of Historic Places and is a National Historic Landmark. The swimming pool was constructed in 1929 and has deteriorated to the point where continued maintenance and operation are financially impractical. The pool will be removed, filled and replaced with a plaza. During design of the plaza, efforts will be made to replicate the outline of the pool in the paving pattern of the new plaza. It is anticipated that this area will be converted to a pedestrian/visitor patio, including picnic tables and seating area, providing elevated vistas of Long Island Sound. There will be minimal impact to the character of the immediate area or the park itself. The Games Row is part of the original design of the amusement park and is listed as a contributing element of the park's historic designation. Similar to the pool, many of the buildings are deteriorated. Rather than reconstruct in place, demolition of the Games Row and relocation of the kiddie rides and games to the area is proposed as an improvement to the layout of the park. No impact on archaeological resources are anticipated since excavations will be limited to depths of previously disturbed areas and will not involve disturbance of previously undisturbed soil.

IMPACT ON OPEN SPACE AND RECREATION

Removal of the pool will eliminate a recreational opportunity at the site. However, the beach will remain available for swimming and will be enhanced by the rehabilitated parking area, the restoration of the bath houses and the introduction of additional amenities and attractions performed under separate capital projects. Existing water attractions within the amusement area will also remain.

IMPACT ON A CRITICAL ENVIRONMENTAL AREA

The project will not have a significant impact on the unique character or use of the site. The majority of project components involve the rehabilitation of existing areas or relocation of facilities within existing developed areas. The overall character and recreation use of the park remains the same.

IMPACT ON NOISE, ODOR AND LIGHT

Noise impacts from construction activity are anticipated but are considered to be temporary in nature. New lighting will incorporate advanced fixtures and elements to provide safe lighting of vehicular and pedestrian areas, minimize energy use and reduce glare off-site.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Westchester County Board of Legislators _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
